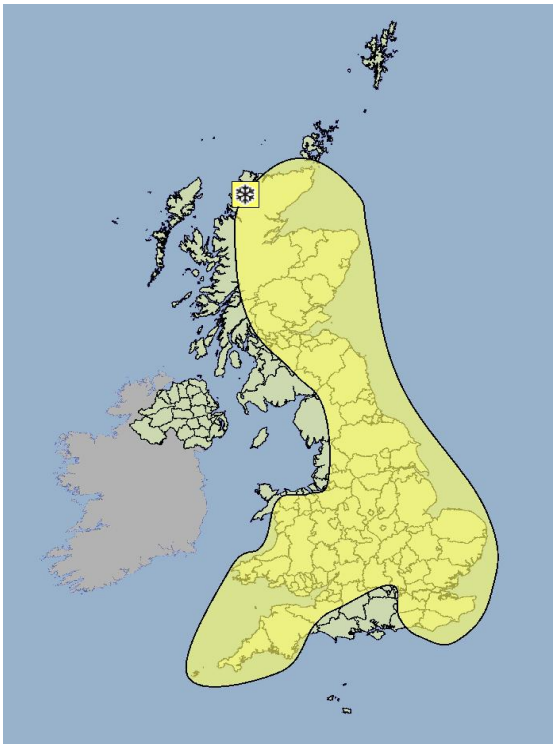
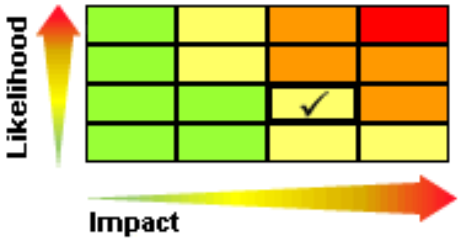
National Severe Weather Warning Service





Chief Forecasters Assessment
Further snow showers are expected through Tuesday, with the potential for a more organised area of snow to push southwest across parts of England and Wales. Separate Amber warnings are being issued to cover those areas which currently look most likely to see impacts. There is the potential for 5-10 cm of snow in places though nearby locations may see only small accumulations of 0-2 cm.

The warning area has been adjusted to take into account latest indications.

Strong winds may lead to drifting of lying snow (and severe wind chill) especially over hills, with lightning perhaps an additional hazard near North Sea coasts.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **00:05 on Tue, 27th Feb 2018** until **23:55 on Tue, 27th Feb 2018**

Snow showers or longer periods of snow are expected on Tuesday, accompanied by very low temperatures.

There is the potential for travel delays on roads, with some stranded vehicles and passengers, as well as delays or cancellations to rail and air travel. Some rural communities could become cut off. Power cuts may also occur and other services, such as mobile phones, may be affected.
